Sagemaker canvas and feature store 1

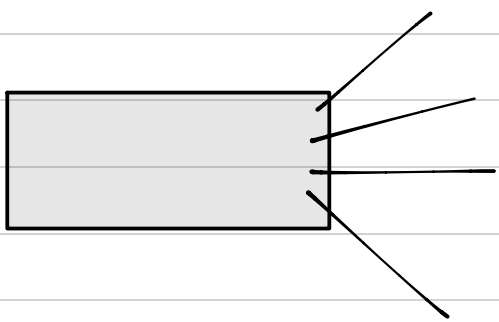

Feature-Store

1. Hotel price prediction.
2. Hotel Recommendation.
3. Hotel Coupon/discount rate prediction.

May need features like:

1. # of booking for <hotel_id> in past 30 days
2. # of clicks for <hotel_id> in past 30 days
3. avg_room per night for hotel in past week

Some key benefits of having feature-store:

1. Centralized feature management.
2. Feature re-usability.
3. Training-Serving Consistency.
4. Feature version and traceability.
5. Better security/governance.

Impact of Row / Column Storage on Analytics

Example query: what is the average product price?

Row-based storage

Product	Price	Availability
Apples	$5	High
Oranges	$3	High
Pears	$11	Low

Data is scanned sequentially per row.

Calculating the average requires a full table scan

Columnar storage

Products	Price	Availability
Apples	$5	High
Oranges	$3	High
Pears	$11	Low

Calculating the average requires only one column to be scanned

Qlik

feature sotr when we create for each feature it will stat keeping that specific data in S3?
is there a specific trigger that is needed or will it happen

2. How much does an Athena query cost?

Assuming standard $5/TB pricing:

Data scanned per query	Approx. cost
10 MB	$0.00005
100 MB	$0.0005
1 GB	$0.005
10 GB	$0.05
100 GB	$0.50
1 TB	$5.00
